

Japanese bath

Year:
2009

Program:
Creation of a private space of relaxation in the park of a holiday house with a Japanese bath, a sauna, a shower and a changing room.

Project management:
Privé

Project manager:
Goudchaux Architecte & Associés

Mission:
Mission de base

Area:
60 m²

This project is situated on a plot of land which contained two small buildings: a barn in ground floor in very poor condition and a secondary deposit. Buildings being very damaged (roof and facades) it was decided to renew them completely and to create a connection between both.

The architectural part was dictated by a will to emphasize the old building and its re-use.

The outside aspect is little modified. Openings are created on the facade in the same spirit as those existing.

The outside are treated (handled) in the style of a Japanese garden.
