Housings bd. Henri Barbusse

Year:
2012

Adress:
19-21 Boulevard Henri Barbusse

Program:
Building bound for housing and at businesses.

Project managment:
Goudchaux Architecte & Associés

Project manager:
Privé

Mission:
Mission de base
PC

Area:
412 m²

Place an urban articulation between a suburban zone and a main axis and integrate the notion of change of ladder into a diffuse urban fabric.
The body of the building receiving housing in floors is divided into two different volumes the nature of the outer materials of which allows a decrease of the visual impact of the set for a better coherence and a putting on the scale of built surrounding.
The construction will be in traditional masonry and will be in compliance with the new measures relative to the sustainable development and to the energy savings.
